

ICASST

International Conference on Aerospace Science and Technology

Call for Papers

The committee of the International Conference on Aerospace Science and Technology (ICASST 2022) invites researchers, professionals and students to present their scientific research work in the form of an oral or poster presentation.

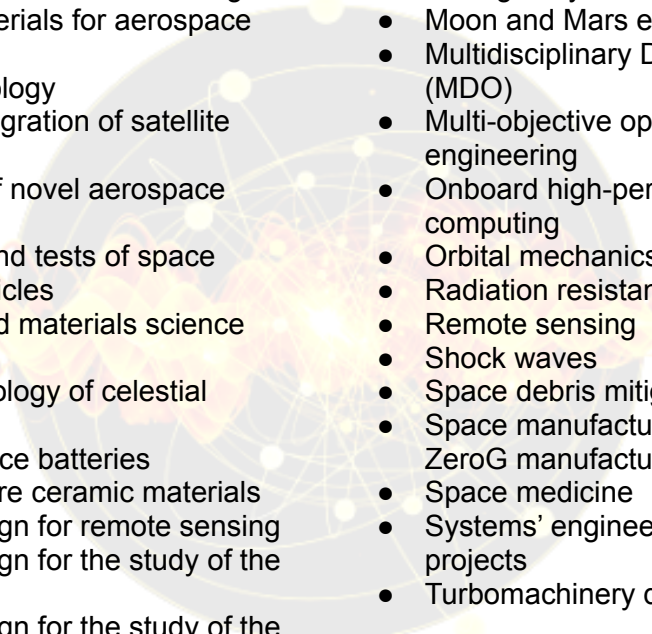

General information

ICASST 2022 is a scientific forum for the dissemination of basic research and/or technological development projects, which allows interaction between professionals, academics and industrialists, promoting scientific-technological collaborations in the aerospace field and related areas. The program includes oral and mural (poster) presentations, keynote lectures given by widely recognized national and international experts in their area, as well as courses/workshops. The conference will be held in a hybrid way, face-to-face/virtual.

ICASST 2022 will be held at the facilities of Centro de Desarrollo Aeroespacial, Instituto Politécnico Nacional, in the historical center of Mexico City, Mexico. The face-to-face modality will take place as long as sanitary conditions allow it.

The list of topics include, but are not limited to:

- Ablative materials
- Additive manufacturing
- Advances in hydro-lox, metha-lox and kero-lox
- Advances in ground station technology
- Advances in onboard computing
- Aeroelastic instability

- 
- Aeronautical and space engineering
 - Aerospace automatic control
 - Aerospace communications systems
 - Aerospace metal alloys
 - Aerospace project management
 - Astrobiology
 - Autonomous navigation systems
 - Technology transfer to Aerospace sector in developing countries
 - Combustion chamber design
 - Combustion instability
 - Composite material manufacturing
 - Composite materials for aerospace applications
 - Cubesat technology
 - Design and integration of satellite technology
 - Development of novel aerospace fuels
 - Development and tests of space exploration vehicles
 - Engineering and materials science
 - Geointelligence
 - Geophysics/geology of celestial bodies
 - High performance batteries
 - High temperature ceramic materials
 - Instrument design for remote sensing
 - Instrument design for the study of the Earth
 - Instrument design for the study of the electromagnetic spectrum
 - Instrument design for the study of the Sun
 - Instrument design solar system and deep space exploration
 - Ionic propulsion
 - Manipulators for space applications
 - Mega constellation engineering
 - Mega constellations and astronomical disruption
 - MicroElectroMechanical Systems (MEMS)
 - Microgravity
 - Moon and Mars exploration
 - Multidisciplinary Design Optimization (MDO)
 - Multi-objective optimization in engineering
 - Onboard high-performance computing
 - Orbital mechanics
 - Radiation resistant hardware
 - Remote sensing
 - Shock waves
 - Space debris mitigation
 - Space manufacturing (microgravity or ZeroG manufacturing)
 - Space medicine
 - Systems' engineering for aerospace projects
 - Turbomachinery design

Important dates

Paper Submission: August 14, 2022

Acceptance notification: September 18, 2022

Camera-ready: October 02, 2022

Notification of presentation's date and time: October 02, 2022

Conference celebration: November 28, 2022 - December 02, 2022

Guide for authors

Selected papers will be published in a Journal (to be announced) indexed in Scopus. Manuscripts should be prepared as follows:

1.- Only the articles received through the EasyChair platform on the dates herein established will be considered for peer-review. Authors should indicate if they prefer oral or poster sessions (however, the Committee reserves the right to assign the exposition modality if necessary). Authors must also disclose whether they should present virtually or in the face-to-face format.

2.- The received manuscripts will be subject to a double-blind review. Articles should be prepared according to the templates published in the webpage of ICASST 2022. The manuscripts sent for peer-review should not feature authors, affiliations, acknowledgements or any information that may disclose the identity of authors. However, authors should send their data through the EasyChair platform for registration purposes (and will not be given to anonymous reviewers).

3.- Manuscripts does not have a page or word limit, and must follow this structure:

- Title
- Author name(s) (for the accepted version after the double-blinded peer review process)
- Affiliation(s) (for the accepted version after the double-blinded peer review process)
- Introduction
- Materials and methods
- Results
- Discussion
- Conclusions
- Acknowledgements (optional, for the accepted version after the double-blinded peer review process)
- References

Some aspects to consider for the manuscripts are the following:

- The article must not have been previously published.
- Submitted manuscripts must be original. A maximum similarity percentage of 30% will be allowed. Smaller percentages will be allowed at the discretion of the reviewers.

A corresponding author must be designated, who must send the article via the EasyChair platform.

4.- The dictum of the submitted work will be informed through e-mail to the corresponding author. In the case of acceptance, authors should make the changes requested by the anonymous reviewers, and commit to send the camera-ready version on the indicated date.

5.- In order to present the work in the conference (in virtual or hybrid mode) and appear in the congress proceedings, at least one of the authors must register, pay the authors fee and present the work at the event.
